

Consultancy: Business Support Plan

The law requires that every business has access to competent advice; conducts risk assessments of its activities, and operates effective arrangements, but not every company can afford their own, in-house, Health and Safety Professional.

And that's where TOWER's expert team can help. All TOWER's consultancy service begin with an initial free consultation from which a detailed proposal setting out your particular requirements and how we will address them. This ensures our clients get what they need, and don't pay for what they don't. Our typical annual contract includes:-

Initial Review

We will carry out a detailed audit of your company's arrangements, and produce a detailed report setting out legal breaches, civil and business risk and opportunities for improvement.

We will assist the Board in agreeing a practical action plan with timescales.

Regular Follow up

At agreed intervals, (normally quarterly) we will visit your business, to review progress against your action plan and support your progress.

If there are any significant changes in law or best practice between visits, we will let you know, and if necessary arrange to come and talk to you.

Ongoing Advise

Between visits, we will still be with you. Feel free to ask questions. We aim to give clear, jargon free responses and unless your question involves considerable work on our part, there is no additional charge.

Additional Services

When you need extra help, TOWER can help. Policies, risk assessments and method statements, development of internal inspection and audit programmes, noise surveys, and environmental concerns and much more all carried out by professional staff who really understand your business.
